**SPECIALIZED FIELDS:**

Surgical oncology and minimal invasive surgery of gastric cancer  
Nutritional support for surgical cancer patients

**Sang-Woong Lee** is an Associate Professor of Gastroenterological Surgery at Osaka Medical College. He graduated there with a medical degree in 1995. He went on for his postdoctoral training as a general surgery resident at Osaka Medical College Hospital. In April 2000, he started to learn advanced laparoscopic surgery for colorectal and gastric cancer. In the next year, he commenced clinical research on preoperative simulation by 3D-CT imaging in laparoscopic gastric cancer surgery, and in 2003, he received the degree of Doctor of Philosophy. In 2011, he described the staple-conserving technique for delta-shaped gastrojejunostomy after LDG, including the first use of barbed sutures for gastrointestinal suturing. So far he has clinical experience with more than 1200 laparoscopic gastric resections for cancer.
